

Intro To Linux Cloud Bootcamp Project 04

? X

← Create Virtual Machine

Name and operating system

Please choose a descriptive name and destination folder for the new virtual machine and select the type of operating system you intend to install on it. The name you choose will be used throughout VirtualBox to identify this machine.

Name:

Machine Folder:

Type:

Version:

← Create Virtual Machine

Memory size

Select the amount of memory (RAM) in megabytes to be allocated to the virtual machine.

The recommended memory size is **1024 MB**.

Next

Cancel

← Create Virtual Machine

Hard disk

If you wish you can add a virtual hard disk to the new machine. You can either create a new hard disk file or select one from the list or from another location using the folder icon.

If you need a more complex storage set-up you can skip this step and make the changes to the machine settings once the machine is created.

The recommended size of the hard disk is **8.00 GB**.

- ☐ Do not add a virtual hard disk
- ☒ Create a virtual hard disk now
- ☐ Use an existing virtual hard disk file

Elementary51.vdi (Normal, 128.00 GB) 

Create

Cancel

Hard disk file type

Please choose the type of file that you would like to use for the new virtual hard disk. If you do not need to use it with other virtualization software you can leave this setting unchanged.

- ☒ VDI (VirtualBox Disk Image)
- ☐ VHD (Virtual Hard Disk)
- ☐ VMDK (Virtual Machine Disk)

Expert Mode

Next

Cancel

Storage on physical hard disk

Please choose whether the new virtual hard disk file should grow as it is used (dynamically allocated) or if it should be created at its maximum size (fixed size).

A **dynamically allocated** hard disk file will only use space on your physical hard disk as it fills up (up to a maximum **fixed size**), although it will not shrink again automatically when space on it is freed.

A **fixed size** hard disk file may take longer to create on some systems but is often faster to use.

- ☒ Dynamically allocated
- ☐ Fixed size

Next

Cancel

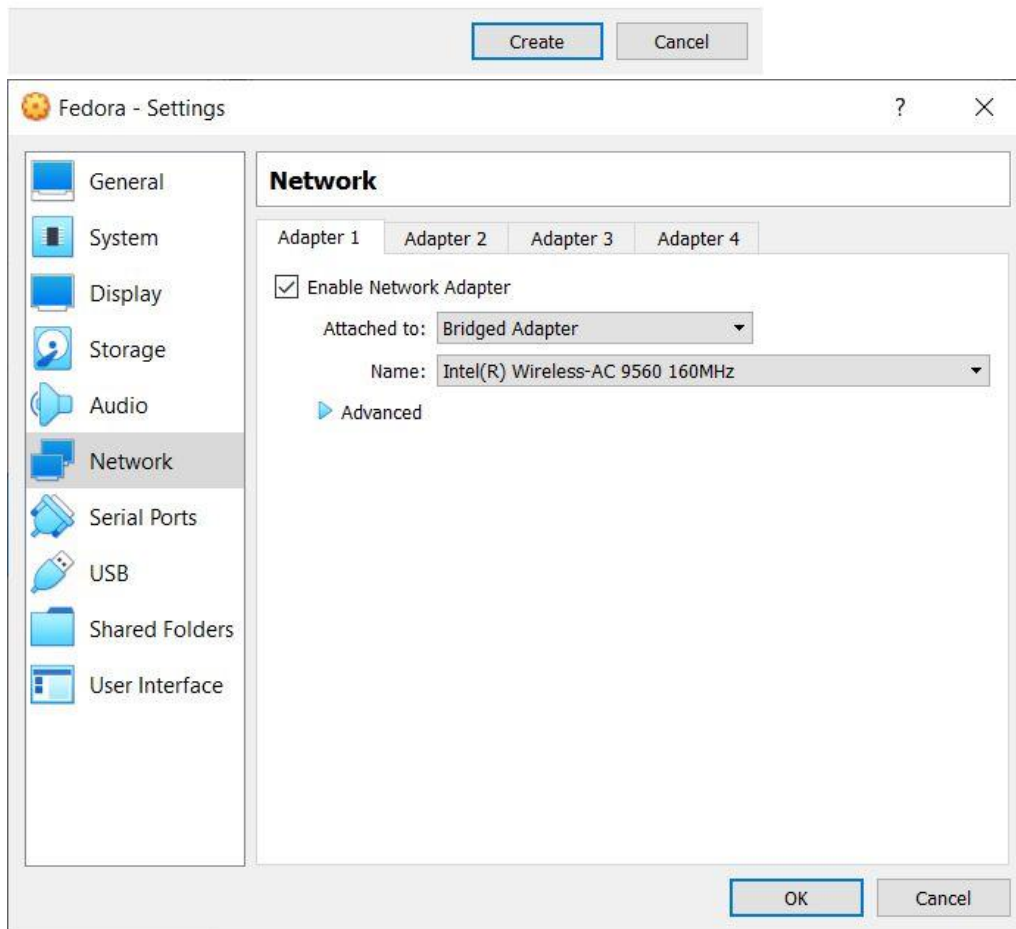

← Create Virtual Hard Disk

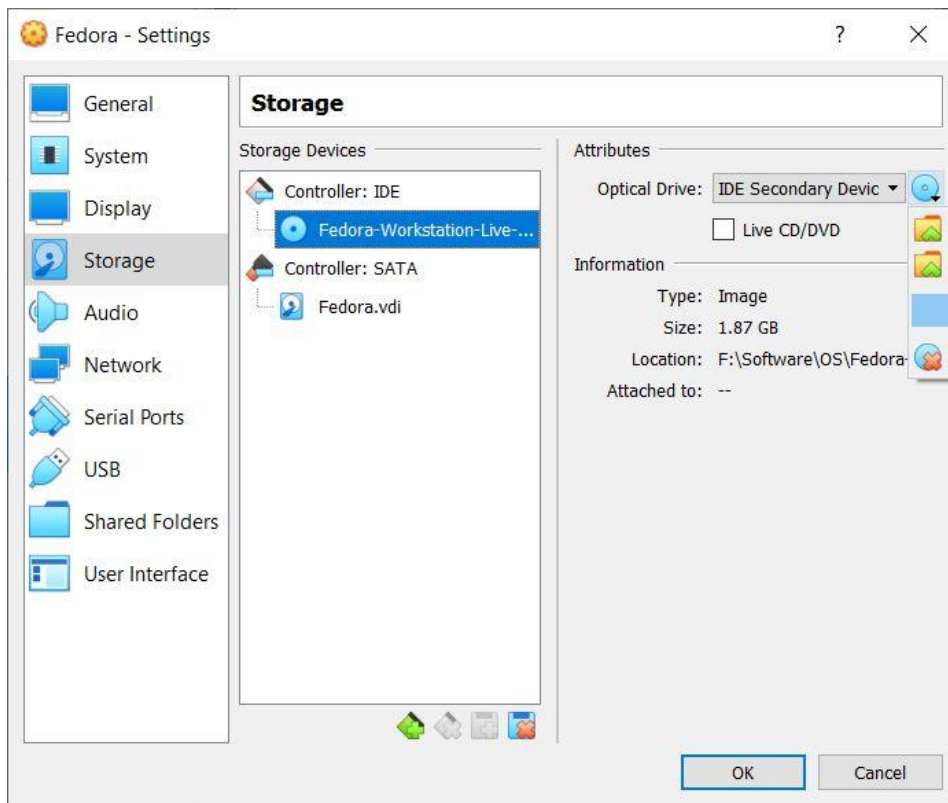

File location and size

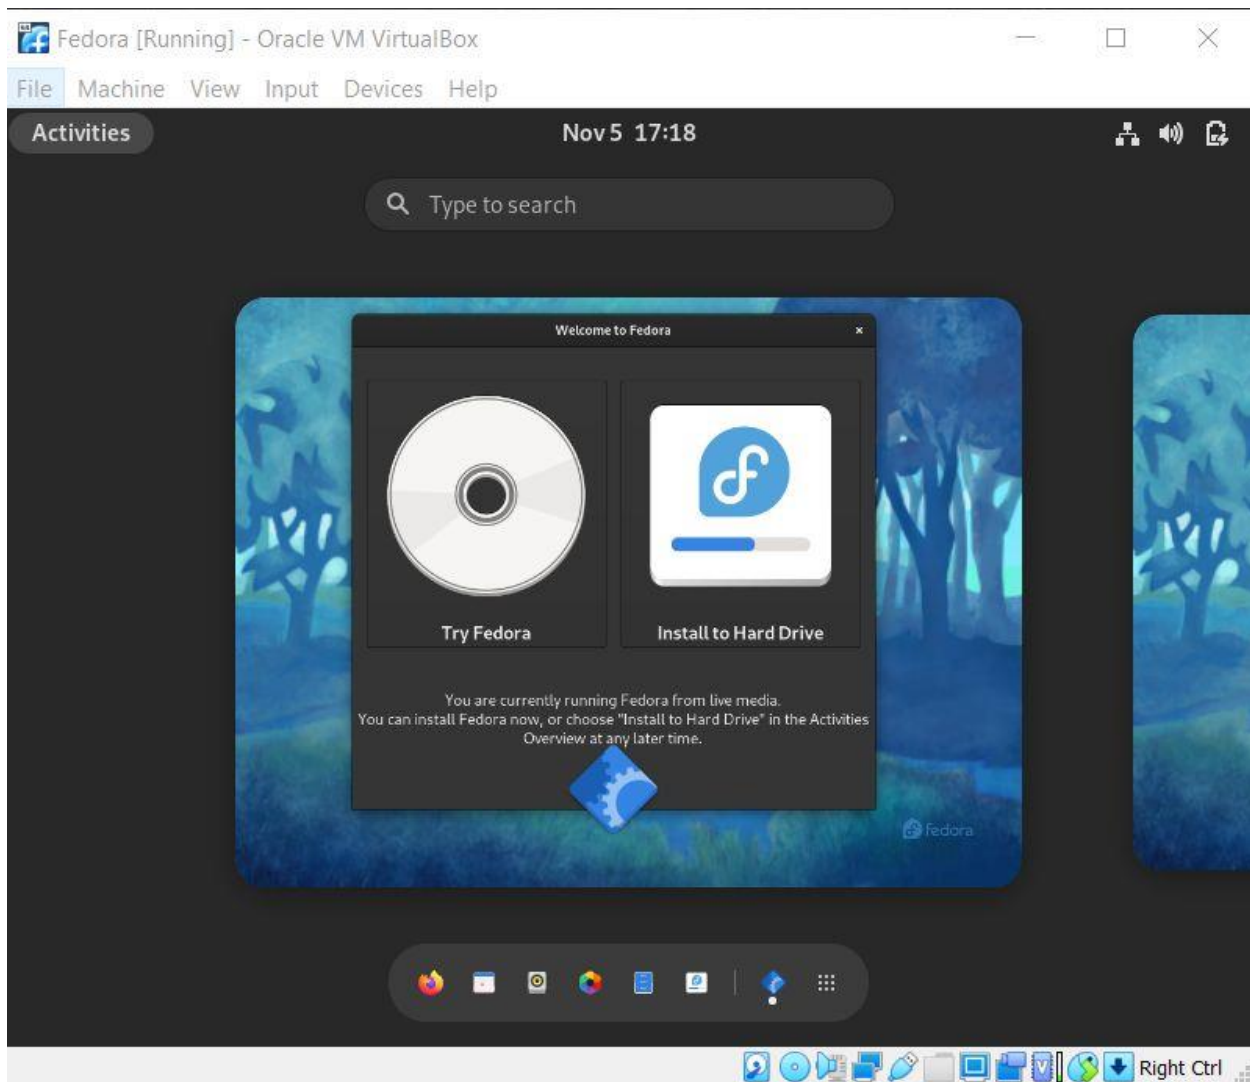

Please type the name of the new virtual hard disk file into the box below or click on the folder icon to select a different folder to create the file in.

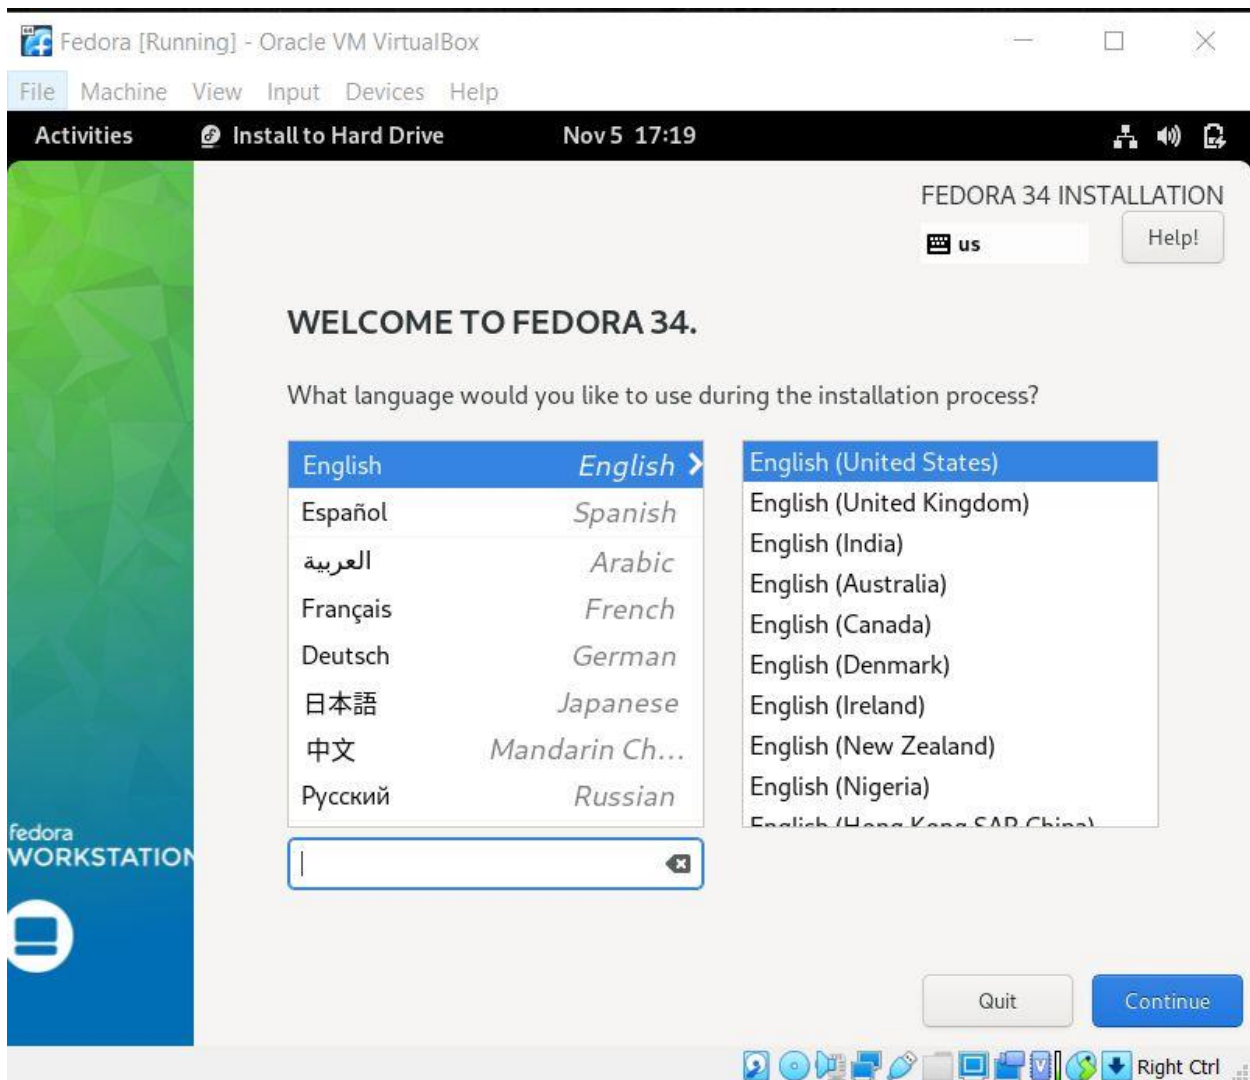

D:\VMs\Fedora\Fedora.vdi 

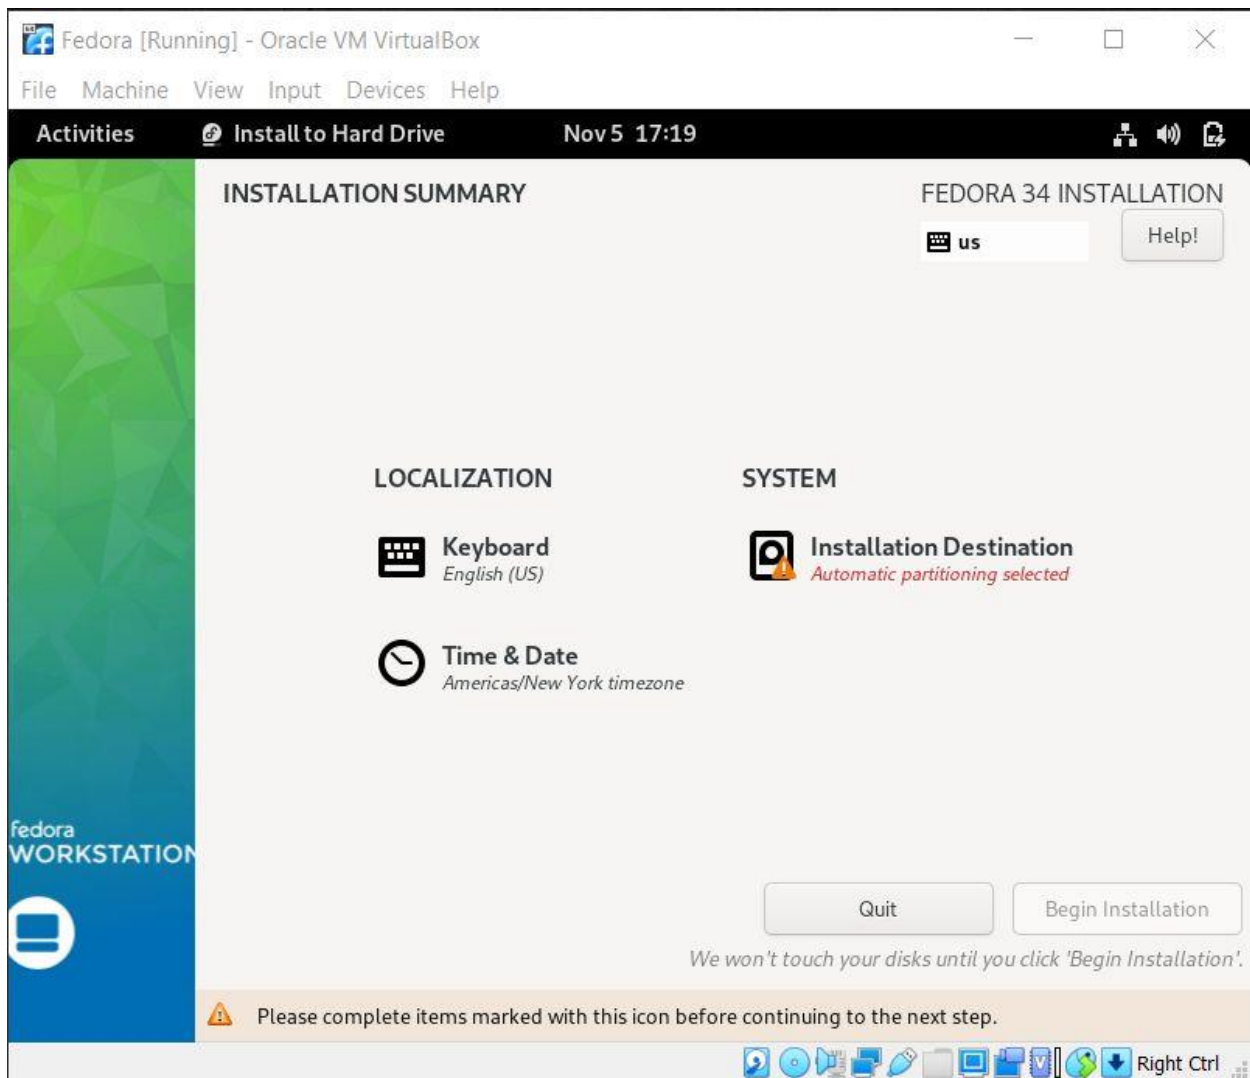

Select the size of the virtual hard disk in megabytes. This size is the limit on the amount of file data that a virtual machine will be able to store on the hard disk.

operating system.

If your system simply has the remains of a version of the Additions you could not remove you should probably continue now, and these will be removed during installation.

Do you wish to continue? [yes or no]

yes

Copying additional installer modules ...

Installing additional modules ...

VirtualBox Guest Additions: Starting.

VirtualBox Guest Additions: Building the VirtualBox Guest Additions kernel modules. This may take a while.

VirtualBox Guest Additions: To build modules for other installed kernels, run

VirtualBox Guest Additions: `/sbin/rcvboxadd quicksetup <version>`

VirtualBox Guest Additions: or

VirtualBox Guest Additions: `/sbin/rcvboxadd quicksetup all`

VirtualBox Guest Additions: Kernel headers not found for target kernel

5.11.12-300.fc34.x86_64. Please install them and execute

`/sbin/rcvboxadd setup`

VirtualBox Guest Additions: Running kernel modules will not be replaced until the system is restarted

Press Return to close this window...
